What year is my cart?

Determining the year and/or model of your cart is an important process when ordering new accessories or replacement parts for your cart. Here is a guide to help you with a few common carts.

Club Car DS & Precedent

Dust Covers

On all Club Car DS models there are a set of dust covers that go over each front hub. The dust cover is either going to be black plastic (New Style) or silver metal (Old Style).

Tops and Top Supports

Another way to determine the year of your Club Car DS is the design of the top and top supports. New style tops have grab handles on both the driver and passenger sides (Shown below), also the top supports are black. On old style tops there are no handles and the top supports are raw aluminum.

Serial Number

All Club Car Models have a serial number sticker or plate located on the cart. On most DS models it is located underneath the dash right above the the rubber floor mat and in the passenger dash compartment on most Precedent models. To determine the year of your cart look at the first two numbers - in the picture below the numbers are "01" that would make the top cart (DS) a 2001 model and the bottom cart (Precedent) a 2004 model.

Precedent Models

The best indicator to tell whether you have a Club Car DS or Precedent is to look at the top rear top supports. The top supports on Precedent models are made of plastic (Shown in picture to right), where as the DS models are either raw aluminum or black aluminum.

EZ-Go TXT, Medalist, Marthon & RXV

Marathon 1976 - 1994.5	Medalist 1994 - 1995	Old Style TXT 1994.5 - 2001.5	New Style TXT 2001.5 - Present	RXV 2008 - Present
<ul style="list-style-type: none"> • 2 separate seat backs • Metal body 	<ul style="list-style-type: none"> • 1 piece seat back • Metal body 	<ul style="list-style-type: none"> • 1 piece seat back • Plastic body • 3 bolt pattern 	<ul style="list-style-type: none"> • 1 piece seat back • Plastic body • 4 bolt pattern 	<ul style="list-style-type: none"> • 1 piece seat back • Plastic body

Steering Column

One of the quickest ways to determine the year of your EZ-Go TXT is to look at the steering column. Located at the bottom of the steering column is a bolt pattern - if you see a 3 bolt pattern you have an old style model and if you see a 4 bolt pattern you have a new style model.

Seat Backs

Another great way to determine the year/model of your EZ-Go cart is by looking at the design of the seat back (The upright cushion). If your cart has two individual seat backs your cart is going to be older than 1995 and most likely a marathon. If your seat back is one solid piece then the cart is newer than 1995.

Manufacturers' Code

All EZ-Go models have a serial plate, on this serial plate are two sets of numbers and letters: A manufacturers' code and a serial number. The top set is the manufacturers' code, the last two numbers in that set will reveal the year of your cart. For example the code to the left is for a 1999 model TXT.

Other Carts & Models

Not all Carts and models are included in this section. If you have any questions or are still unsure of what year your cart is please call or email one of our representatives!

For Yamaha and other models please visit the "What year is my cart?" page on our website.

Call toll-free: 1-866-291-5244

Diamond Plate Accessories

Diamond & Stainless Kick Plates

Kick plates are a great, affordable way to dress-up your cart! Available in Diamond Plate, Stainless Steel & Black powder coat finishes.

Progressive Suspension™ 512 series shocks

High performance suspension does not have to mean a high price tag! The 512 Series was the first aftermarket shock made specifically for Utility ATV's. They have undergone extensive R&D to provide the finest possible suspension for your workhorse vehicle. Using improved spring rates for heavier load stability and handling over rough terrain as well as increased length for more travel and ground clearance. The 512 Series comes with an adjustable spring preload to accommodate different loads.

Heavy Duty Springs

Rear heavy duty springs are a must for any cart with a seat kit or cargo box! Increase load capacity and decrease rear wheel rub. Works with most kits, please call for more information.
